

Childhood Day: safe fundraising guidance

Please see below our guidance on keeping safe before, during and after your collection shift:

Before your collection:

- If you feel unwell on the day of the collection, have symptoms of Covid 19 or have tested positive for Covid 19- **please do not** attend your collection and follow the guidance on cancelling your collection slot
- Let us know of any reasonable adjustment/support needed to participate in this event.

During your collection:

- Please be 'distance aware':
 - Always be mindful of giving way to the public
 - Remove yourself immediately from a location should it feel too overcrowded and if you feel uncomfortable
 - Respect people's personal space and circumstances

If you witness a medical emergency:

- Dial 999
- Make the area around the casualty safe for you, others and the casualty
- Monitor the casualty and/or find out what happened
- Comfort the casualty
- Brief your collection lead

Cash Handling:

- Once you are at your specified collection base, your collection lead will meet you here and make sure you have everything you need.
- Your safety is of utmost importance to us - you will be paired up with another collection volunteer, so you won't be collecting on your own.
- If you need to leave your collection spot pass your bucket/contactless device to the other person.
- In the unlikely event that someone tries to take your tin or bucket please let it go.
