Number Day

Number Day Match

Over the years schools have come up with great ideas of how to have fun with numbers. For Number Day we thought we'd share some of them with you. Number Day Match involves lots and lots of numbers that all relate to the work of the NSPCC, but will you match the correct numbers to the correct question?

Number Day Match can involve pupils, teachers and parents too. The whole school can have fun while learning about the NSPCC and raising money at the same time. Pupils can be given the question sheet and asked to research the answers using the NSPCC web site even **www.nspcc.org.uk**

How to raise money

Pupils, parents and teachers are sponsored for every question they get right or parents and carers can make a donation.

What you need:

- The question sheet, which contains a series of questions about the NSPCC as well as the answers – however the answers need to be matched to the correct question.
- small prize for the winning person / team (optional).

How to play:

- Number Day Match can be run in class or as an activity for pupils to complete at home
- The activity can be done individually, in teams, or you could even invite parents and staff to join in
- You could choose to set this as research or homework for older pupils. They could use the NSPCC web site to find their answers and learn more about the history of the NSPCC and how we help children
