

# Eco-friendly shopping

## TEACHER'S NOTES

### This is a fun way to help develop and practice:

- addition and subtraction
- budgeting.

Pupils can also learn about some great eco-friendly items!

### How to raise money:

Parents could donate an amount for each set a pupil comes up with, or even price match their favourite item.

### How to play:

1. Put the items up on your whiteboard.
2. Ask pupils to list as many different sets of items from the list as possible that come in under £50.

Tag us online:

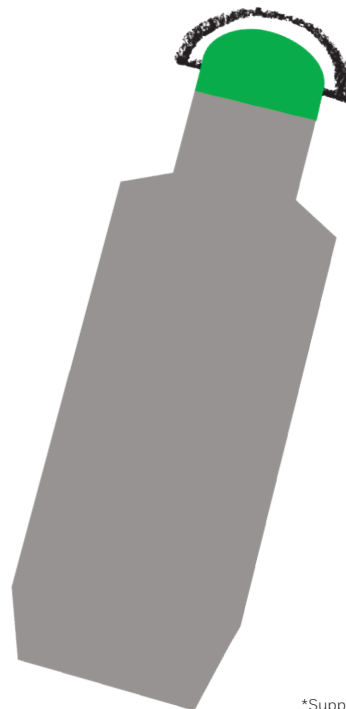

**#numberday**

### Tell your pupils:

Mrs Butler wants to buy some eco-friendly alternatives for her house.

She doesn't want to spend more than £50.

List different sets of items she could buy from her wish list. Add the prices up in your head. Make as many sets as you can.
