What's missing from the

Christmas tree

Materials: Tray, 10 small Christmas decorations or household items, something to cover them over, paper, pens

Players: 2-10

This memory game is great for all ages! Can you remember what's disappeared from the tree?

Gather 10 or more small objects that will fit on a tray together. Once they're on a tray, players have 30 seconds to memorise what's there before they're covered over. Everyone then has 5 minutes to write down as many things as they can remember on a sheet of paper.

At the end of each round, add up the scores and keep a running total. To keep playing, you can remove an object between each round and try to guess what's missing.
